

Tax planning and compliance for your business

Effective planning to ensure compliance and achieve business objectives

At Blick Rothenberg we make it our business to know your business. Effective tax planning not only requires a thorough understanding of the complex body of tax legislation, but also of your business and your objectives. Our advice is specifically tailored to your needs and your future plans.

Corporate tax planning

You may be considering buying or selling, or restructuring your business. A large part of your sales may be international or you may be about to embark on a major transaction. Perhaps yours is a family business and you want to know the most tax efficient way to pass it onto your children. Each scenario will require a different approach – we can advise on the best options for you and your business. We also have considerable experience in international transactions. We can advise on the most efficient international structure to minimise group taxation, making the best use of the planning opportunities presented by various jurisdictions around the world.

Corporate tax compliance

Of course tax planning is only one side of the coin, corporate tax compliance is just as important. We have a highly skilled team of corporate tax staff to deal with an ever continuing and

increasingly complex body of tax legislation. It's our job to make sure you meet all your corporate tax self assessment deadlines. We're there to help you with the complex returns, making sure they are properly filed and that you've claimed all legitimate tax relief.

In some circumstances you may have to pay tax by instalment on your company's anticipated profits. We'll help you with your profit projections and make sure you avoid costly mistakes. In short – our corporate tax team will make sure you pay only what you owe and on time, taking the administrative burden out of paying your corporate tax.
