

Multi-territory business support

Blick Rothenberg Global Business Services provides centralised outsourced accounting and administrative support to international businesses operating in multiple territories.

We streamline group accounting functions into a single point of access, saving our clients considerable management time. Our systems are SOC 1 accredited meaning businesses that are governed by Sarbanes-Oxley legislation can rely upon the quality of our service.

Process

Our service is coordinated and managed by one central team of contacts in the UK who understand your business and speak your language. This eliminates the need for our clients to recruit specialist in-house accounting teams and to manage several supplier relationships.

Consolidated financial reports are accessible through our web interface which is a completely secure network. The system allows for global access to financial reports, 24 hours a day.

Services

Our services can be entirely tailored to individual client needs and can cover:

- Maintenance of ledgers
- Management reporting
- VAT compliance
- Payroll
- Expense management

Reach

Our team in the UK is supported by dedicated partner firms throughout the world. These firms are either fellow members of BKR International, our global association of independent accounting firms, or they are firms with which we have

established formal partnerships. We currently have a presence in over 50 countries.

Blick Rothenberg draws on this experience to provide clients with expert local knowledge, in the local language, in all the regions which they operate.
